Redmine - Patch #1607

empty version instead of "Unknown version" for svn

2008-07-09 14:25 - Hiroyuki Iwatsuki

Description

Hi,

Redmine r1646 failed to get svn property when it failed to get svn version.

```
NoMethodError (You have a nil object when you didn't expect it!
The error occurred while evaluating nil.<):
    /lib/redmine/scm/adapters/subversion_adapter.rb:112:in `properties'
    /app/models/repository.rb:63:in `properties'
(snip)
```

Redmine::Scm::Adapters::SubversionAdapter.client_version returns String "Unknown version" when failed to getting svn version.
After that String("Unknown version") compared with Array([1, 5, 0]) at Redmine::Scm::Adapters::SubversionAdapter#properties

```
        def properties(path, identifier=nil)
          # proplist xml output supported in svn 1.5.0 and higher
          return nil if (self.class.client_version <=> [1, 5, 0]) < 0
```

I think that Redmine::Scm::Adapters::SubversionAdapter.client_version should return Array instead of String.

Thanks,

Not r1646 but r1643 (trunk).

#2 - 2008-07-12 11:05 - Jean-Philippe Lang

- Status changed from New to Closed

Fixed in r1652.
