

Redmine - Defect #16145

Apache git Authn

2014-02-21 20:21 - Anton Rubets

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	SCM extra	Estimated time:	0.00 hour
Target version:		Affected version:	2.3.3
Resolution:	Cant reproduce		

Description

hi i cant integrate git with redmine. I have looked at wiki topic and configure apache, grack, git but when i trying clone git repo i see

```
Can't locate object method "some_auth_required" via package "Apache2::Redmine" at /usr/local/lib/perl5/site_perl/5.16/mach/Apache2/Redmine.pm line 321.\n
```

I change little the Redmine.pm code

```
package Apache2::Redmine;

=head1 Apache2::Redmine
```

Its more comfortable for me in freebsd.
If someone have issues for this?
P.S. with default Redmine.pm the same
Thx for help

History

#1 - 2014-02-21 22:47 - Toshi MARUYAMA
- Category changed from Accounts / authentication to SCM extra

#2 - 2024-04-02 20:11 - Holger Just
- Status changed from New to Closed
- Resolution set to Cant reproduce

See [HowTo configure Redmine for advanced git integration](#) for a guide to enable git integration in Apache.
If this does not work, please reopen this issue and provide additional details to allow us to reproduce this issue.
