Redmine - Feature #16180

Expose Public/Private via API

Description

I am trying to extend the API to return the "private" journal field.

The API obeys user authentication with displaying whether or not the journal is returned but I would like to know if the note is private if it is returned.

The issues_controller.rb file seems to use the standard format.api method (line 128) but that does not return this field.

Is there any easy way to force this?

Soln is as follows for anyone that needs it:

diff -r redmine-2.4.3/app/views/issues/index.api.rsb redmine-2.4.3_updated/app/views/issues/index.api.rsb
26a27,28

        api.is_private issue.is_private

diff -r redmine-2.4.3/app/views/issues/show.api.rsb redmine-2.4.3_updated/app/views/issues/show.api.rsb
19a20

        api.is_private @issue.is_private
