Category:	Accounts / authentication	**Estimated time:**	0.00 hour
Target version:			
Resolution:	Invalid	**Affected version:**	0.9.6

Description

you could type USA in country and not know what is wrong before getting frustrated. Can we add it in or block it? Can we add a Red X mark as we do for Vanity Tag so the error is more clear?

the format matches you perfectly when you do something correct but does not reprimand when you do not.
