- Status changed from Closed to Reopened

Plugin is valid.

I defined defect on Windows in file config/routes.rb:

```
Dir.glob File.expand_path("plugins/*", Rails.root) do |plugin_dir|
  file = File.join(plugin_dir, "config/routes.rb")
  if File.exists?(file)
    begin
      instance_eval File.read(file)
    rescue Exception => e
      puts "An error occurred while loading the routes definition of #{File.basename(plugin_dir)} plugin (#{
file}): #{e.message}."
      exit 1
    end
  end
end
end
```

It finds only plugin_dir = "<install_path>/plugins/."

Then i replace it with block:

```
Dir.glob File.expand_path("plugins/*/config/routes.rb", Rails.root) do |file|
```

```

    if File.exists?(file)
      begin
        instance_eval File.read(file)
      rescue Exception => e
        puts "An error occurred while loading the routes definition of plugin (#{file}): #{e.message}."
        exit 1
      end
    end
  end
end
end

```

But it loose info about Plugin name.

#3 - 2014-03-05 09:58 - Toshi MARUYAMA

- Status changed from Reopened to Closed

- Resolution changed from Invalid to Cant reproduce

I cannot reproduce.

```

$ ruby --version
ruby 1.9.3p545 (2014-02-24) [i386-mingw32]

```

```

$ hg pare
