**Description**

It looks like the function formatted\_value in [source:/trunk/lib/redmine/field\\_format.rb](#) accepts a parameter html, but never uses it. Custom fields with a url pattern present are always returned as links.

Example Custom Field "External Link":

Format: Integer

Name: External Link

Link values to URL: https://support.example.com/tasks/%value%

Display in notification email:

External Link: <a href="https://support.example.com/tasks/26215">26215</a>

Environment:

Redmine version	2.5.0.stable.12954
Ruby version	1.9.3-p448 (2013-06-27) [i686-linux]
Rails version	3.2.17
Environment	production
Database adapter	Mysql2
