Resolution:	Invalid		

Description

Hi All,

I have a centos5 server and have redmine 0.7.3 installed. Ruby version is ruby 1.8.7 (2008-06-20 patchlevel 22) [i686-linux] and my gems list are showing below

- LOCAL GEMS ***

actionmailer (2.1.0, 2.0.2)
actionpack (2.1.0, 2.0.2)
activerecord (2.1.0, 2.0.2)
activeresource (2.1.0, 2.0.2)
activesupport (2.1.0, 2.0.2)
cgi_multipart_eof_fix (2.5.0)
daemons (1.0.10)
fastthread (1.0.1)
gem_plugin (0.2.3)
haml (2.0.1)
mongrel (1.1.5)
rails (2.1.0, 2.0.2)
rake (0.8.1)
tlsmail (0.0.1)

I can able to installed the red mine on the server as per the instructions on the site. I have faced 2 kind of problems.
1, whenever I click on the activity pages it shows internal error and I am stuck with its implementation on the server. Errors are listed below

ActionView::TemplateError (undefined method `length' for #<Enumerable::Enumerator:0xb77e74c8>) on line #7 of projects/activity.rhtml:

```
4: <h3><%= day_name(day.cwday) > <= day.day ></h3>
5: <ul>
6: < @events_by_day[day].sort {|x,y| y.event_datetime <=> x.event_datetime }.each do |e| >
7:   <li><p><%= format_time(e.event_datetime, false) > <= link_to truncate(e.event_title, 100), e.event_url ><br />
8:   < unless e.event_description.blank? ><em><%= truncate(e.event_description, 500) ></em><br />< end >
9:   <span class="author"><%= e.event_author if e.respond_to?(:event_author) ></span></p></li>
10: < end %>
```

```

2. Whenever I am trying to integrate subversion with redmine, I am getting the error "Entry and/or revision doesn't exist in the repository". We are using http method to connect svn. Is that issue with SVN ?. I have restored the database from the server and it works successfully on my desktop without showing any issue either on "activity" tab or "repository" tab.

I am also getting the svn checkout error from the terminal.

svn: The path was not part of a repository

svn: PROPFIND request failed on '/'

svn: '/' path not found

Can anybody tell me that what would be the wrong with My redmine.

Any comments greatly appreciated,

Liju

#1 - 2008-07-14 12:55 - Liju Mathew

- File *activity.rhtml* added

- Status changed from *New* to *Resolved*

Hi,

I have resolved the issue with activity pages. I replaced the attached page (activity.rhtml) with redmine file. It's truncate function error. But repository module still showing the error "Entry and/or revision doesn't exist in the repository".

My subversion is 1.4.5 and rails is 2.1.0 version. I can able to check the repository manually and also can able to integrate it with local redmine.

Whenever I try to checkout from the terminal, I got the following error. This problem exist only on server and repository is also working well.

svn co <http://subversion.mydomain.com/myproject/>

svn: The path was not part of a repository

svn: PROPFIND request failed on '/'

svn: '/' path not found

Pls guide me.

Thanks,

Liju

#2 - 2008-07-14 17:38 - Jean-Philippe Lang

- Status changed from *Resolved* to *Closed*

- Target version *deleted* (0.7.3)

- Affected version (*unused*) *deleted* (0.7.3)

- Resolution set to *Invalid*

- Affected version *deleted* (0.7.3)

0.7.3 is not compatible with Rails 2.1 and ruby 1.8.7. Please read [RedmineInstall](#).
You will find the cause of your PROPFIND error on this page: [Download](#).
