| Resolution: | Cant reproduce | | |
| Description | | | |
| I'm running Redmine 2.3.2.stable.12119 | | | |
| Some users have set the following preferences for mail notification: | | | |
| <ul style="list-style-type: none">• Only for things I watch or I'm involved in• I don't want to be notified of changes that I make myself -> Deactivated (so they explicitly want to be notified about changes they make themselves) | | | |
| The expected behaviour is, the author of an issue is receiving a notification the moment he is creating the issue or every time he/she is updating the issue. | | | |
| Unfortunately this is not working for my Redmine. Regardless of the setting (no_self_notified), users never receive a notification for the changes they make themselves. It's also not working for watchers and assigned users, I got the impression that the setting is simply ignored. | | | |
| Maybe I'm wrong and I'm expecting a different behaviour than provided by Redmine. I would appreciate any help. | | | |
