Description

Hello,

Can anyone help to configure email on localhost which is working on IP.

http://192.168.1.88:3001/redmine this is complete URL where my redmine is working.

default: # Outgoing emails configuration (see examples above)
email_delivery:
delivery_method: :smtp
smtp_settings:
#tls: true
#enable_starttls_auto: true
#openssl_verify_mode: 'none'
address: "192.168.1.88:3001"
port: 25
domain: "domain.com"
#authentication: :plain
#user_name: "email.test@gmail.com"
#password: "email123"

Please help.

Thanks,
Nirmal Tailor
