

Redmine - Defect #16376

Assigned to me widget on my page

<b>Resolution:</b>	Duplicate		
<b>Description</b> If I use the "Created Tickets" widget ontop of the "Assigned to me" widget, the "Assigned to me" widget shows ticket which I'm not Assigned to. If I click on the "Assigned to me" widget link to the normal ticket overview it shows the right amount of tickets. If I swap the positions both widgets show the righth amount of tickets.  If sticks together somehow: I also tried a plugin which allows to use custom filter on my page, there are tickets missing where <<me>> is used. We figured out that the tickets which are assignend to our group are missing on the my page widget, but they are shown if we use the same filter in the ticket overview.
