

Redmine - Defect #16451

Incomprehensible number of issues returned from REST API (issues.json)

2014-03-28 06:17 - TipTop Labs

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	REST API	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Invalid		
Description			
<p>I am looking at a public Redmine project at http://www.hostedredmine.com/projects/hosted-redmine/roadmap</p> <p>It currently lists 2 versions and $59 + 77 = 156$ issues.</p> <p>When I query issues at http://www.hostedredmine.com/projects/hosted-redmine/issues.json I get only 32 (i.e. total_count with limit 25) and it is unclear to me how the selection is made.</p> <p>Is this a feature or a bug? How can one retrieve all issues in a project with multiple versions?</p>			

History

The issue-query returns (by default) only open issues.

If you want all issues, use [http://www.hostedredmine.com/projects/hosted-redmine/issues.json?status_id=*](http://www.hostedredmine.com/projects/hosted-redmine/issues.json?status_id=)

Total_count = 255, still different from roadmap, because roadmap only returns issues with a target version

- Status changed from New to Resolved

Thanks, that solves my problem.

#3 - 2014-03-29 15:42 - Jean-Philippe Lang

- Status changed from Resolved to Closed

- Resolution set to Invalid
