

Redmine - Defect #16487

REST Custom Field Filter requires project_id but not documented

2014-04-01 17:46 - Tyghe Vallard

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	REST API	Estimated time:	0.00 hour
Target version:		Affected version:	2.2.2
Resolution:			
Description			
It seems that this effects both 2.2.2-stable and 2.4-stable			
<ol style="list-style-type: none">1. Create Custom Field2. Set as both searchable and filter3. Assign to tracker and project			
This returns only the issues with Custom Field ID 1 and value <value> /issues.json?project_id=<projectid>&cf_x=<value>			
This returns all issues /issues.json?cf_x=<value>			
The Wiki from what I can see does not indicate that the project_id is required, but it seems to be. Not sure if that is intended or not, but needs to be fixed or documented as such.			
Environment:			
Redmine version	2.2.2.stable		
Ruby version	1.9.2 (x86_64-linux)		
Rails version	3.2.11		
Environment	production		
Database adapter	PostgreSQL		
Not sure if it matters or not, but I have 2.2.2-stable and 2.4-stable both installed on Heroku and both have the same issue.
