<b>Resolution:</b>	Fixed		

**Description**

We are using redmine trunk revision 1645 on a CentOS 5.2 server.  
mysql 5.0.44  
ruby 1.8.7  
rails 2.1.0

When we move an issue from one project to another, the category is lost on the issue even though the category exists in both projects.

This is what shows in the logs for the move (X's replace sensitive data):

Processing IssuesController#move (for 127.0.0.12 at 2008-07-16 11:11:13) [POST]  
Session ID: XXXXXX  
Parameters: {"new\_tracker\_id"=>"", "commit"=>"Move", "ids"=>["154"], "new\_project\_id"=>"5", "action"=>"move", "id"=>"154", "controller"=>"issues"}  
Redirected to <http://XXXXXXX/projects/devq/issues>  
Completed in 0.07481 (13 reqs/sec) | DB: 0.04585 (61%) | 302 Found [<http://XXXXXXX/issues/move/154>]

Associated revisions

**Revision 1697 - 2008-07-26 11:27 - Jean-Philippe Lang**

When moving an issue to another project, reassign it to the category with same name if any (#1653).

History

**#1 - 2008-07-17 17:16 - Hiroyuki Yoshioka**

- *File issue.patch added*

I guess this is not a bug.

But this patch enables you to do what you want.

**#2 - 2008-07-26 11:25 - Jean-Philippe Lang**

- *Category set to Issues*

- *Status changed from New to Closed*

- *Target version set to 0.8*

- *Resolution set to Fixed*

Fixed in [r1697](#). When moved, the issue will now be reassigned to the category with same name if any.

**#3 - 2008-07-26 11:25 - Jean-Philippe Lang**

- *Tracker changed from Defect to Feature*
