<b>Description</b> A client of <a href="#">Planio</a> has created a repository with the identifier statistics and was unable to access that repository via the web UI. While investigating this issue, we discovered that the reserved words list for repository identifiers ( <a href="#">source:/tags/2.5.1/app/models/repository.rb#L43</a> ) is incomplete (browse and others are missing) or wrong (stats should be statistics, show is double).

- File 16564.diff added

The attached patch fixes this and has a list of reserved words as per rake routes | grep repository which should be complete. This doesn't handle possibly existing repos with those identifiers though.
