

Redmine - Defect #16569

watchlist search displays users that are not members to the current project

2014-04-09 02:18 - Hervé Brelay

Status:	Closed	Start date:	
Priority:	Urgent	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Duplicate		
Description			
Assuming the following:			
- User1 has access to Project1 (regular developer)			
- User2 has access to Project2 (regular developer)			
When User1 wants to add a watcher on an issue in Project1, it gets a list of users that can be one by one selected, as well as a "search" box on top.			
When typing any letter on the search box, the selectable list is refreshed, but now shows names of users that are not in the Project (i.e. typing "u" would show User2), backspace then shows the whole list of Redmine users.			
This is quite un-desirable as in most installations, some projects are not public, hence their members should not show up in some other project's UI screen.			
This has been found on 2.3.2.			
It is still present in a test install of 2.5.0			
This is quite serious as it violates privacy settings
