Description

The token generator in Mailer.rb (Mailer.token_for) has the following code:

```ruby
host = Setting.mail_from.to_s.gsub(%r{^.*@}, '')
```

If you have configured Redmine to send from an address with both name and email, (f.ex. “Redmine Mailer<no-reply@redmine.org>”) this results in a Message-id like the following being created:

```text
<redmine.journal-2421.20140408113649@redmine.org>>
```

the double “>“ at the end is considered illegal by some mail servers, and results in them rejecting it.

A possible solution could be the following:

```ruby
host = Setting.mail_from.to_s.gsub(%r{(^.*@)|>}, '')
```

Associated revisions

Revision 13126 - 2014-05-02 09:56 - Jean-Philippe Lang

Mailer.token_for generates invalid message_id when using from address with full name (#16619).

Revision 13155 - 2014-05-24 18:29 - Jean-Philippe Lang

Merged r13126 (#16619).

History

#1 - 2014-05-02 09:56 - Jean-Philippe Lang
- Subject changed from Mailer.rb token generator to Mailer.token_for generates invalid message_id when using from address with full name
- Status changed from New to Resolved
- Assignee set to Jean-Philippe Lang
- Target version set to 2.5.2
- Resolution set to Fixed

Fixed in r13126, thanks for pointing this out.
Merged.
