Target version:				
Resolution:	No feedback			

Description

Hello,

It is possible to export an issue to pdf or subscribe it as a feed.

But it would be nice to implement a feature that allows to directly push the issue to the standard-printer.
It would be also nice if we could push attached documents like pdf or txt files to the printed issue too.

Thank you

(Don't know why this issue was deleted?!)

- Due date set to 2014-04-28

- Status changed from New to Needs feedback

Every browser I know of has a "print" option that fulfills the usecase described.
Please elaborate on what you think redmine should be doing.
