| **Target version:** | 2.6.0 | | | |
| **Resolution:** | Fixed | | | |

**Description**

This feature was implemented in ChiliProject :

- https://www.chiliproject.org/issues/791
- https://www.chiliproject.org/projects/chiliproject/repository/revisions/21685caf5f34c943c78824639b9be667e86a6801

I was just wondering why it wasn't integrated in core Redmine, and thought it appropriate to raise it :)

Thanks for your time,
