

## Redmine - Feature #16717

### Add \_blank support for "Link values to URL"

2014-04-18 08:22 - Maxim Krušina

<b>Status:</b>	New	<b>Start date:</b>

<b>Resolution:</b>			
<b>Description</b> I would be great to have one more controll in definition of custom fields new feature - "Link values to URL". Plz just add checkbox: [x] Open links in a new window So links will open with "_blank".  Anyway, great work with custom fields, thanx!

Hello! Ceccarelli, Akkas, Nicolet, and Krušina:

I just saw the Lefko Media page and I remembered this post. (<https://lefkomediamedia.com/adding-external-link-indicator-with-css/>)

After a couple of years in other projects, now I have to go back to work with Redmine.

For me, it's always a pleasure 'to play' Redmine again!  
(Really, Thank you very much Mr. Lang !!).

Well, press **F12** keyboard key and view on your browser-debugger the class assigned to div.

- For my installation, the Custom-Fields corresponds to cf\_55, this is custom\_field 55..
- Look what topic you have activated in Redmine. (admins screens..).
- And then from console (putty o whatever..) inserted into file of its corresponding directory  
../public/theme/NAMEofTheme/stylesheets/application.css the following code at the end thereof: (**altering the number of** your custom field: Of course).

And ready !

```
div.cf_55.attribute div.value a:after {  
  color: red;  
  content: url(/images/link.png);  
  margin: 0 3px 0 5px;  
}
```

If you have FontAwesome, then:

```
div.cf_55.attribute div.value a:after {  
  color: red;  
  font-family: 'FontAwesome';  
  content: " \f08e";  
  margin: 0 3px 0 5px;  
}
```

- To open in a new window, to press Ctrl + Mouse Click on the link and, thus, will not be necessary to alter the core file views / issues / index.html.erb following the techniques proposed by Anton Argirov in the topic: <http://www.redmine.org/boards/3/topics/33949>

Enjoy !
