

Redmine - Defect #1672

Exporting wiki page containing a table of contents to HTML produces incorrect output

2008-07-22 11:56 - Anonymous

Status:	Closed	Start date:	2008-07-22
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Wiki	Estimated time:	0.00 hour
Target version:	0.8	Affected version:	0.7.2
Resolution:	Fixed		
Description			
If a wiki page containing a {{toc}} tab is exported to HTML (using the 'Other formats: HTML' option at the bottom) then then output of table of contents part of the page is incorrect. The table of contents items aren't placed on separate lines and so aren't very readable. See the attached output from the FAQ page for an example.			

History
