

Redmine - Defect #16739

custom_fields.json only returns single tracker instead of array of trackers

2014-04-23 09:37 - Ruud Senden

Status:	Closed	Start date:	
Priority:	High	Due date:	
Assignee:	Jean-Philippe Lang	% Done:	0%
Category:	Custom fields	Estimated time:	0.00 hour
Target version:	2.5.2	Affected version:	2.3.4
Resolution:	Fixed		
Description In my Redmine 2.3.4 installation, the custom_fields.json API returns only a single tracker, even when a custom field has been assigned to multiple trackers. I managed to patch my Redmine installation to correctly return the full list of trackers for a custom field. In app/views/custom_fields/index.api.rsb, the following line: api.trackers do Should be changed to api.array :trackers do I think the same is true for the roles by the way, but since I'm not using that functionality I didn't bother to patch it.
