Redmine - Defect #16808

No hook for issues closed by commit

2014-05-05 20:37 - Sidney San Martín

Status:	Closed		**Start date:**	
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	Issues		**Estimated time:**	0.00 hour
Target version:				
Resolution:	Invalid		**Affected version:**	2.3.2

Description
Notification plugins like [zulip-redmine-plugin](#) seem to use the controller_issues_edit_after_save hook. It doesn't look like this hook gets triggered when I mention or close an issue in a commit (e.g. "fixes #whatever" in a commit message), so we don't get notified. Should this hook be getting triggered in this case, or is there a general "issue changed" hook we could use?

History

#1 - 2014-05-24 12:58 - Jean-Philippe Lang

- Status changed from New to Closed

- Resolution set to Invalid

Controller hooks are used to handle custom params (eg. retrieving from form elements added by a plugin).
If you need a hook at model level that is triggered when an object is updated, you should use regular [ActiveRecord callbacks](#) instead.
