Redmine - Patch #16925

Improve performance of Principal.member_of scope

2014-05-19 23:20 - Jean-Baptiste Barth

Status:	Closed		**Start date:**	
Priority:	Normal		**Due date:**	
Assignee:	Jean-Baptiste Barth		**% Done:**	0%
Category:	Database		**Estimated time:**	0.00 hour
Target version:	2.6.0			

Description
Using a sub-query is faster, see [r13139](). Targetting for 2.6.0.

Associated revisions

Revision 13139 - 2014-05-19 23:17 - Jean-Baptiste Barth

Improve performance of Principal.member_of scope

The 'join' turns to be slow for large numbers of members (>20k). Using a
sub-query like in Principal.not_member_of is more efficient and performance
is the same for smaller values.

- Status changed from Resolved to Closed

Fwiw I have this in a plugin for 4 months and it works great. I close the issue, the commit will be integrated when JPL creates the 2.6-stable branch I
think.
