<b>Description</b>			
Dear Redmine team,			
Our project customers meet the situation that they have the large number of issues in their project. They need more issues in page (200, 500, ...).			
Beside that, for particular cases, they also need to save page size options to their custom queries.			
Please consider this case.			
BRs, Thanh Trinh

- Status changed from New to Needs feedback

They need more issues in page (200, 500, ...).

This is already implemented: Administration -> Settings -> Objects per page options

Oh, sorry for my mistake. I didn't see it.  
Thanks.
