

Redmine - Patch #1700

Support for extra macros to help in move from trac

2008-07-28 18:31 - Robert Shell

Status:	New	Start date:	2008-07-28
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Wiki	Estimated time:	0.00 hour
Target version:			
Description			
<p>With moving from trac needed some more macros for linking issues back to wiki pages to show queue sizes, new tickets waiting in a area etc. <code>issue_list</code> Lists Issues matching a list of given parameters</p> <pre>!{{issue_list(tracker,category,status,user,max)}}</pre> <p><code>issue_count</code>, Count number of issues matching a set of filters (tracker,owner,category,status currently supported as filters)</p> <pre>!{{issue_count(tracker=xxx,category=xxx,status=xxxx)}}</pre> <p><code>issue_query</code>: Same as <code>issues_count</code> be returns lists and not single count</p> <pre>!{{issue_query(tracker=dddd&category=dsdd&status=dddd&owner=ssss&max=10)}}</pre> <p>Also with more of wiki pages across had problems with lose of TitleIndex function so re-implement this for redmine. I Have added ability to create a number of styles of list.</p> <p><code>title_list</code>: Inserts an alphabetic list of all wiki pages into the output. Appears as a unordered list</p> <pre>{{title_list(title-prefix)}}</pre> <p><code>title_menu</code>: Inserts an alphabetic menu (toc style) of all wiki pages into the output. This uses the toc css to produce a nice side menu to link groups of pages together.</p> <pre>{{title_menu(title-prefix,level,max,css-sytle)}}</pre> <p><code>title_bar</code>: Inserts an alphabetic menu of all wiki pages into the output. This is basically aimed a across the screen menu with details menu currently styled as a table to our old trac navigation.</p> <pre>!{{title_bar(title-prefix,level,max,css-sytle)}}</pre> <p><code>title_index</code>: <code>title_index</code> boxed up titles by letter to create a glossary or index. Use this for generation of a glossary and for larger indexes of pages.</p> <pre>!{{title_menu(title-prefix,columns,max)}}</pre> <p>—</p>

History

#1 - 2008-07-28 18:34 - Robert Shell

Have a update of trac loader rake task to follow, just have a few more conversions to automate. Just dealing with n x trac to 1 redmine issues with ticket numbers.

#2 - 2008-11-08 16:33 - Robert Shell

- File `macros.rb` added

Enhanged and fixes a number of the marcos.

#3 - 2008-11-08 17:00 - Karl Heinz Marbaise

Hi Robert,

take a look at #2114.

Kind regards

Karl Heinz Marbaise

#4 - 2011-12-05 10:20 - Etienne Massip

- Subject changed from Support for extra macors to aid in move from trac to Support for extra macros to help in move from trac
