Redmine - Defect #17045

Error message while bulk update of multiple trackers

2014-06-01 09:53 - Lajish Lakshmanan

Status:	Closed		**Start date:**	
Priority:	Normal		**Due date:**

Category:			**Estimated time:**	0.00 hour
Target version:				
Resolution:	Invalid		**Affected version:**	

Description

Bulk update of multiple trackers at a time(*say 40-50*) throws an error message.

I am running redmine 2.5.1 version on windows server 2012 having 16 gb ram. Bulk update is done to change assignee whici is being carried on same machine itself.

I think redmine can't handle too many request at a time.

History

#1 - 2014-06-12 07:24 - Toshi MARUYAMA

- Status changed from New to Needs feedback

https://www.google.com/#q=proxy+timeout+redmine

#2 - 2014-06-16 08:15 - Lajish Lakshmanan

- File Bulk Update error-02.png added

From issues listing page, redmine provides a facility to update multiple trackers at a time as shown in image attached(i.e Bulk Update error-02.png). After doing this update, redmine remains hang for some time which results in an error message which I reported in previous image(attachment)

#3 - 2014-07-13 14:49 - Toshi MARUYAMA

Please describe what hang is. Webserver? Proxy?

#4 - 2014-07-14 06:25 - Lajish Lakshmanan

This issue has been resolved. When redmine is configured to access Thin servers directly(i.e. through 3001 or 3002), everything went well.
You can update this tracker status as **Resolved**. Thanks for spending your valuable time to look into this matter.

#5 - 2014-08-12 12:22 - Toshi MARUYAMA

- Status changed from Needs feedback to Closed

- Resolution set to Invalid

Thank you for your feedback.
