

Redmine - Defect #17068

When copying subtasks with relations between them self's are lost

2014-06-03 14:01 - Fernando Hartmann

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Issues	Estimated time:	0.00 hour
Target version:		Affected version:	2.4.4
Resolution:			
Description			
Suppose I have a task (Task1) with two subtasks, Sub1 and Sub2 and Sub1 precedes sub2. If I copy Task1 with subtask, the relation between the subtask aren't copied to the new ones.

- File 0001-models-issue-copy-subtask-issue-relationships.patch added

I Created a patch against 3.4 stable to implement copying subtask interrelations.
It applies cleanly to master.
I have been unable to test on master yet due to issues with updating rails (dependency problems for actionpack-xml_parser. Ill do this if I ever get time allotted to continue upstream effort, but as I am doing this as part of my (very busy) day job, I doubt that will happen any time soon, so if anyone wants to take this patch and test it on master, I would be grateful.

This patch is currently working fine on our live 3.4 server.
