### Redmine - Feature #17164

## file:/// repository insecure

Target version:

Resolution: Duplicate

### Description

Could there be a way to restrict file:/// URLs in repositories? If, SVN projects are accessible by the webserver (likely if using dav\_svn) anyone with permissions to add a repository has unrestricted access to any repository on the webserver viewable by the server process, almost equivalent to filesystem access.

Save the following code as 'config/initializers/99-restrect-svn-file-scheme.rb' and restart Redmine. You will be not able to set 'file:///.....'.

```
require_dependency 'repository/subversion.rb'
module RestrictSvnFileScheme

def self.included(base)
  base.send(:include, WrapperMethods)

base.class_eval do
    alias_method_chain :url=, :restrict_file_scheme end
end

module WrapperMethods
  def url_with_restrict_file_scheme=(v)
    write_attribute(:url, v) if v !~ %r|\Afile://|i end
```

Repository::Subversion.send(:include, RestrictSvnFileScheme)

## #2 - 2014-06-12 19:21 - John Pham

I got the following error on 2.4.2 (ubuntu 14.04 package):

```
uninitialized constant Redmine::Scm::Adapters::AbstractAdapter::CommandFailed (NameError)
  /var/lib/redmine/default/passenger/lib/redmine/scm/adapters/abstract_adapter.rb:30:in `<class:AbstractAdapte

```

#### but adding

```
class CommandFailed < StandardError #:nodoc:
end</pre>
```

seems to fix it. Thanks!

#### #3 - 2014-11-07 02:35 - Go MAEDA

- Related to Defect #18291: Path property security issue when adding filesystem repository added

#### #4 - 2014-11-08 11:59 - Jean-Philippe Lang

- Status changed from New to Closed
- Resolution set to Duplicate

Closing as a dup of #1415 which is addressed for 3.0 by adding configuration settings to limit valid repository path.
