Description			
<p>Hi,</p> <p>For some reason, I cannot use Issue Importer plugin with my Redmine 2.5.1.</p> <p>After the setup, I can see new tab labeled "translation missing: en.label_import" between Wiki and Repository.</p> <p>When I click this, it will navigate to HTTP 404 error and I've gotten stuck here.</p> <p>Could someone reading this advise me on the solution ?</p>
