**Description**

As of Redmine 2.5.1 the group options appear to be limited to:

- My custom queries
- Custom queries

with the layout on screen something like this:

```
My custom queries
* Query 1
* Query 2
* Query 3
* Query 4

Custom queries
* Query 1
* Query 2
* ...
```

I believe that a layout similar to this would be useful to organize the queries:

```
My custom queries
  Query Group 1
    * Query 1
    * Query 2
    * ...

  Query Group 2
    * Query 3
    * Query 4

Custom queries
* Query 1
* Query 2
* ...
```

The query groups could be collapsible to keep from taking up too much screen space.
