Description

Hi all,

I want to add a custom field "Resolved by" just like filter "Assignee" in issue tracking.

How can I make the value of "Resolved by" as same as value of "Assignee" in different projects dynamically?

Thanks.

One more thing, is there any way to populate a custom field value(user type) if assignee changes any bug status (say **open** to **resolved**) then custom field **Resolved By** should get populate by **Assignee's** name
