Redmine - Patch #17239
ActionMailer cannot send email via SSL SMTP
2014-06-20 10:15 - hongbo yang

Status: Closed
Priority: Normal
Assignee: 
Category: Email notifications
Target version:

Description

I'm setting up a Redmine with Bitnami Stack. All works but sending email not.

Environment:
Redmine version 2.5.1.stable
Ruby version 1.9.3-p545 (2014-02-24) [x86_64-linux]
Rails version 3.2.17
Environment production
Database adapter Mysql2

SCM:
Subversion 1.8.8
Git 1.9.0

Filesystem
Redmine plugins: no plugin installed

I googled through web, I find the solution:
http://www.redmine.org/boards/2/topics/13625?r=15681 referenced:

the action mailer cannot handle ssl smtp server correctly. the referenced url gives a bug fix for redmine (or for rails)

I tried that smtp settings does have a ssl option
so currently we do not need the mailer_ext.rb patch file to work with SSL smtp server. but the ssl option is not mentioned in current doc

default:
  # Outgoing emails configuration (see examples above)
  email_delivery:
    delivery_method: :smtp
  smtp_settings:
    address: smtp.domain.com
    port: 465
    ssl: true
    enable_starttls_auto: true
    domain: domain.com
    authentication: :login
    user_name: redmine@domain.com
    password: xxxx
