Redmine - Patch #17239
ActionMailer cannot send email via SSL SMTP
2014-06-20 10:15 - hongbo yang

Status: Closed
Priority: Normal
Assignee:
Category: Email notifications
Target version:

**Description**

I'm setting up a Redmine with Bitnami Stack. All works but sending email not.

Environment:
- Redmine version: 2.5.1.stable
- Ruby version: 1.9.3-p545 (2014-02-24) [x86_64-linux]
- Rails version: 3.2.17
- Environment: production
- Database adapter: Mysql2

SCM:
- Subversion: 1.8.8
- Git: 1.9.0

Filesystem

Redmine plugins:
no plugin installed

I googled through web, I find the solution:

http://www.redmine.org/boards/2/topics/13625?r=15681 referenced:

the action mailer cannot handle ssl smtp server correctly. the referenced url gives a bug fix for redmine (or for rails)

I tried that smtp settings does have a ssl option
so currently we do not need the mailer_ext.rb patch file to work with SSL smtp server. but the ssl option is not mentioned in current doc

default:
   # Outgoing emails configuration (see examples above)
   email_delivery:
      delivery_method: :smtp
   smtp_settings:
      address: smtp.domain.com
      port: 465
      ssl: true
      enable_starttls_auto: true
      domain: domain.com
      authentication: :login
      user_name: redmine@domain.com
      password: xxxx
