

Redmine - Defect #17370

404 Error when Creating New Issue/Attachments - Everything else works

2014-07-02 21:25 - John H

Status:	Closed	Start date:	
Priority:	Urgent	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Invalid		
Description			
<p>As mentioned, everything works, including: adding/editing users, creating projects, roles, modifying settings, etc.</p> <p>However, when I try to create a New Issue, I get a 404 and the issue is NOT created in SQL Server. However, if I manually add an issue in SQL, I can view it in Redmine. Also, when I first go to "New Issue", it put a 0 in "parent task" and a "(NULL)" in the wysiwyg description of the issue.</p> <p>Furthermore, whenever I try add an attachment, I also get the same problem.</p> <p>I tried redeploying the .war, remigrating and population the sql tables and everything else I could think of. Still no resolution.</p> <p>I'm using: OS: Windows Database: MS SQL Server 2008 R2 Web Server: Tomcat7</p> <p>Please see the attached picture, as it may be of help.</p>
