Description

You can fix this one with a little bit cleaner code:

Change:

```
<button class="tab-left" onclick="moveTabLeft(this); return false;"></button>
```

to:

```
<button class="tab-left" type="button" onclick="moveTabLeft(this);"></button>
```

Browsers defaults often to type="submit" which submits the form. If you explicitely define a type, it will be fine.

The return false; is not the cleanest way, as... if you call some code afterwards, it won't be executed because the propagation ends there.

Associated revisions

Revision 13326 - 2014-07-14 15:06 - Jean-Philippe Lang

Use type="button" instead of return false; (#17401).

Patch by Daniel Felix.

History

#1 - 2014-07-14 15:06 - Jean-Philippe Lang

- Category changed from UI to Code cleanup/refactoring
- Status changed from New to Closed
- Target version set to 2.6.0

Patch committed in r13326, thanks!
