

Redmine - Defect #17423

#<issue_num> substitution is broken in text after coderay block

2014-07-08 11:33 - Peter Volkov

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Peter Volkov	% Done:	0%
Category:	Wiki	Estimated time:	0.00 hour
Target version:		Affected version:	2.5.2
Resolution:	Cant reproduce		

Description

If there is coderay text highlighted block in wiki page, #<issue-num> substitutions are broken. Here is a test case to reproduce the issue.

h1. Test

This link works #1!

```
<pre><code class="ruby">
# The Greeter class
class Greeter
  def initialize(name)
    @name = name.capitalize
  end
  def salute
    puts "Hello #{@name}!"
  end
end
end
</pre>
```

While this not #1 :(

This bug is reproducible in 2.2.4 and 2.5.2.

Well... please try this with valid html.

Your example is broken. You have a pre and then a code tag opened, but you just close the pre.

See here:

Test

This link works [#1!](#)

```
# The Greeter class
class Greeter
  def initialize(name)
    @name = name.capitalize
  end
  def salute
    puts "Hello #{@name}!"
  end
end
end
```

While this not [#1](#) :(

- *Status changed from New to Needs feedback*
- *Assignee set to Peter Volkov*
- *Resolution set to Cant reproduce*

Please give some feedback.

#3 - 2014-07-10 12:49 - Peter Volkov

True, with it works as expected, thank you. Although it'll be valuable if parser somehow reported such problems ;)

#4 - 2014-07-10 13:51 - Daniel Felix

- *Has duplicate Defect #17418: regression: attachment:file is not rendered on wiki page added*

#5 - 2014-07-10 13:52 - Daniel Felix

- *Status changed from Needs feedback to Closed*

Well this is a default problem of browsers. They try to autofix as best as they can ;)
