Description

I just hit the problem of a broken subtask tree once more. This is a long standing problem that I have seen and reported before. See for example:

#11011 - reported by me - ultimately closed as not reproducible.
#15581 - reported by my colleague.

I was creating a 3 level tree of bugs to be fixed using multiple tabs to add new subtasks at each level. This is how far I got:

Parent.jpg
However when I click on issue 8644 in that tree (first level child) it gets most of the rest of the tree displayed on its page:

Child.jpg
I checked in the database and this is what I see in the left and right :

id	parent_id	root_id	lft	rgt
8798	8644	8642	11	18
8803	8798	8642	12	13
8804	8798	8642	14	15
8805	8798	8642	16	17
8799	8644	8642	19	20
8800	8644	8642	21	22
8801	8644	8642	23	24
8802	8644	8642	25	26

Using

select id, parent_id, root_id, lft, rgt from issues where id > 8797 order by lft, rgt;
