

Redmine - Defect #17437

Missing attachments in fixtures

2014-07-10 10:39 - Kirill Smirnov

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Wont fix		
Description			
According to test/fixtures/attachments.yml, there should be a bunch of attachments in test/fixtures/files/2006/07 folder:			
060719210727_error281.txt			
060719210727_picture.jpg			
060719210727_document.txt			
060719210727_logo.gif			
060719210727_source.rb			
060719210727_changeset_iso8859-1.diff			
060719210727_archive.zip			
...			
But the target folder contains only four of them:			
\$ ls test/fixtures/files/2006/07/			
060719210727_archive.zip			
060719210727_changeset_iso8859-1.diff			
060719210727_changeset_utf8.diff			
060719210727_source.rb			
Is it intentional or is a bug to be fixed? This breaks our plugin tests.			

History

#1 - 2014-07-14 11:37 - Jean-Philippe Lang

- Status changed from New to Closed
- Resolution set to Wont fix

These fixture files aren't needed in tests and won't be added, you should handle that in your tests.
