<b>Description</b>													
<p>I configured Redmine to use markdown for text input. On my main wiki page, I added a link: [API](api)</p> <p>Which renders to: &lt;a class="external" href="api"&gt;API&lt;/a&gt;</p> <p>But when I'm on the main page, it points to `projects/PROJECT/api` instead of `projects/PROJECT/wiki/api`, thus giving me a 404 when clicked.</p> <p>Environment:</p> <table><tr><td>Redmine version</td><td>2.5.2.stable</td></tr><tr><td>Ruby version</td><td>2.0.0-p353 (2013-11-22) [x86_64-linux]</td></tr><tr><td>Rails version</td><td>3.2.19</td></tr><tr><td>Environment</td><td>production</td></tr><tr><td>Database adapter</td><td>Mysql2</td></tr></table>				Redmine version	2.5.2.stable	Ruby version	2.0.0-p353 (2013-11-22) [x86_64-linux]	Rails version	3.2.19	Environment	production	Database adapter	Mysql2

I see the same behavior with Redmine configured to use the ckeditor plugin for text input.

Environment:

Redmine version	2.5.2.stable
Ruby version	2.0.0-p353 (2013-11-22) [x86_64-linux]
Rails version	3.2.19
Environment	production
Database adapter	PostgreSQL

Looking a little further, this behavior doesn't seem to persist if you rename the Start page to something other than Wiki.

But you need to leave the Start page as "Wiki" in Settings=>Wiki for the project or it breaks again.
