

Redmine - Feature #17576

Ability to choose, in administration page, the behaviour of status during copying issues

2014-07-29 11:18 - Anthony HERBÉ

Status:	Closed	Start date:	2008-06-30
Priority:	Normal	Due date:	
Assignee:	Jean-Philippe Lang	% Done:	0%
Category:	Issues	Estimated time:	0.00 hour
Target version:			
Resolution:	Duplicate		
Description			
<p>The current behaviour of copying issues is to keep status : If we copy a closed issue I create a new closed one in Redmine 2.5.2.</p> <p>This behaviour could be set in administration.</p> <p>Administrator could choose if copying issues keep original status (current behaviour) or set the status to default one.</p> <p>In fact, due to workflows, preserve status can forbid users to work on issues, if original status is used. Because, they can't change the status of copied issue.</p> <p>Another element is that, currently copying an issue give the ability to a user to choose too much values of status for a copied issue during creation (It seems there is no relation between copying issue and workflows during create a copying issue).</p>

- Copied from Defect #1551: Copying issues resets Status added

#2 - 2014-07-29 11:28 - Anthony HERBÉ

It means that the administration permits to change the default behaviour but user can choose, during the copying operation, among the original status and the default one.

In one case, if administrator choose the default one, user have this status by default during copying operation without others modifications and in the other case, user have the original status. In these two cases, user can choose in the two types of status.

+1 I'm interested by this feature because currently when we copy and change a tracker we get a different tracker with a status that is not necessary related to the new workflow.

#8 - 2016-02-05 13:54 - Nils Grimm

+1 This is a very useful feature while moving issues.
