

Redmine - Defect #17608

Problem when updating the to ubuntu 14.04

2014-08-04 13:17 - Hud Hood

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Ruby support	Estimated time:	0.00 hour
Target version:		Affected version:	2.4.2
Resolution:	Invalid		

Description

I have not been able to update my redmine. Everytime I ran `apt-get upgrade`, I'm getting a ruby not found error:

```
Setting up redmine (2.4.2-1) ...
dbconfig-common: writing config to /etc/dbconfig-common/redmine/instances/default.conf
Creating config file /etc/redmine/default/database.yml.new with new version
dbconfig-common: flushing administrative password
Populating database for redmine instance "default".
This may take a while.
/usr/bin/env: ruby1.8: No such file or directory
Error when running rake db:migrate, check database configuration.
dpkg: error processing package redmine (--configure):
 subprocess installed post-installation script returned error exit status 1
Errors were encountered while processing:
 redmine
E: Sub-process /usr/bin/dpkg returned an error code (1)
```

I am stuck now. My redmine has stopped working.

History

- #1 - 2014-08-05 09:36 - Etienne Massip
- Status changed from New to Closed
 - Priority changed from High to Normal
 - Resolution set to Invalid

Not a Redmine bug, please post in [Help](#) forum.
