Description I have updated my redmine from 1.x to 2.X. Everything seems to be working fine until I wanted to add new users or check the settings. I can see the list of users but unable to add new one, as when I click new, it went to the error page. @Internal error An error occurred on the page you were trying to access. If you continue to experience problems please contact your Redmine administrator for assistance. If you are the Redmine administrator, check your log files for details about the error. Back@ The same error appeared when I clicked settings.
