

## Redmine - Feature #17666

### Tickets: Allow custom queries to display as (virtual) Module/Tab

2014-08-12 15:35 - Anonymous

<b>Status:</b> New	<b>Start date:</b>
<b>Priority:</b> Normal	<b>Due date:</b>
<b>Assignee:</b>	<b>% Done:</b> 0%
<b>Category:</b> UI	<b>Estimated time:</b> 0.00 hour
<b>Target version:</b>	
<b>Resolution:</b>	
<b>Description</b> This functionality should provide the manager of a project to make a stored and often used <b>custom query</b> for tickets/issues available as a Tab (Module) on project level (selectable when storing the query: <i>show as tab</i> ).  Benefits: <ul style="list-style-type: none"><li>• often used queries are available via single click</li><li>• as custom tracker are (slightly mis-)used for other purposes as <i>meetings, notes, general responsibility</i> this help structuring a project and increase navigation.</li><li>• furthermore it would support using redmine ticket system in a very generic usage.</li></ul>	

#### History

We access our redmine 99% of the time through browser bookmarks that point to custom queries, and after navigating inside Redmine we often use the same bookmarks to "start again" from some bird-view.

I could definitely see value in flagging custom queries to be always visible as tabs in a project.
