Description			
Trying to build the RDocs for Redmine fails because README_FOR_APP is missing.			
<pre>\$ rake doc:app (in /home/edavis/dev/redmine/redmine-core) rake aborted! Don't know how to build task 'doc/README_FOR_APP'</pre>			
(See full trace by running task with --trace)			
(I know this is a trivial defect but I wanted to log it so it appears in the changelog and to see if I can fix it)
