Description

Trying to build the RDocs for Redmine fails because README_FOR_APP is missing.

\$ rake doc:app

(in /home/edavis/dev/redmine/redmine-core)

rake aborted!

Don't know how to build task 'doc/README_FOR_APP'

(See full trace by running task with --trace)

(I know this is a trivial defect but I wanted to log it so it appears in the changelog and to see if I can fix it)
