

Redmine - Feature #17797

If no wiki pages have been created, wiki tab should return something more informative than 404

Target version:			
Resolution:			
<b>Description</b> We've received bug reports from users saying that wiki pages are broken, when a project has wiki enabled but the owner simply hasn't created any pages. If no wiki pages exist at all, either the navigation link should be turned off or the resulting page should say something to that effect.
