Whereas the "deletion" of line 22 in the screenshot isn't part of the changeset at all:

And also this diff gets wrong syntax highlighting for the meta-lines "---" and "-- "

So I would expect the line 22 not to be rendered at all and an the syntax highlighting, there should be no highlighting for "---" and "-- "

- Subject changed from rendering of patch files (attachments) has a bug in reading the patch/diff format to rendering extra "--" footer of git patch

It is not standard diff format.
It is git additional footer.
Mercurial patch does not have such footer.

It can be fixed with the following code:

```
