

Redmine - Patch #1789

Raise project-name length-limit from 30 to 35 characters

Description I just needed this modification due to projects structure in Redmine and thought it might be usefull for some other users. Note that this patch raises the maximum-length of a project-name from 30 characters to 35 characters. If the limit of 35 characters isn't sufficient modify the patch by replacing the instances of 35 to the desired maximum-length. Warning: this patch can malform/break different views depending on your setup. I guess that is the main reason why project-names are limited to 30 characters by default.

Could you increase the length to 60 characters? Is there any issues increasing the length to that limit?

#3 - 2010-01-14 13:33 - Alexey Palazhchenko

+1. I think 30 characters is not enough for non-English languages.

#4 - 2010-06-19 19:05 - Alexey Palazhchenko

It's better to increase it to 60 or something.

#5 - 2010-08-19 16:37 - Erwin Mueller

+1. This 30 characters limit is really annoying. If there are any visibility issues than the modules should take care of it and the name should not have any limit. The same goes for the limit of the project's identifier. Can we please rise the limits to at least 255?

Thanks!

#9 - 2011-03-11 05:02 - whoiam whoiam

Could you please give me some guide how to raise project-name length-limit from 30 to 35 characters by writing a plugin instead of a patch file?

Thanks in advance

#10 - 2011-03-15 09:00 - whoiam whoiam

I got the following error when i run the patch file in Redmine v1.0.1. Could you please let me know how to fix it?

(Stripping trailing CRs from patch.)
patching file app/models/project.rb
