Redmine - Patch #17900

Allow change value of the time_entry object via controller_issues_edit_before_save hook from a plugin

Description

At the moment we could not made some modification on time_entry from controller_issues_edit_before_save hook.
Because the object created is push in time_entries attribute, so a plugin using the controller_issues_edit_before_save hook could not access to the latest entry and change the value if needed.

The attached patch make that possible.

I'm interested by the apply of this patch !

#2 - 2017-06-22 17:47 - Paul Thevenot

I'm also interested! Could we know if it will be applied and when?
