Description

I just needed this modification due to projects structure in Redmine and thought it might be usefull for some other users.

Note that this patch raises the maximum-length of a issue-category name from 30 characters to 40 characters. If the limit of 40 characters isn't sufficient modify the patch by replacing the instances of 40 to the desired maximum-length.

Warning: this patch can malform/break different views depending on your setup. I guess that is the main reason why issue-category names are limited to 30 characters by default.
